

EVERYTHING YOU NEED TO KNOW ABOUT HVAC

To build a successful career as an HVAC technician, there is a lot you need to know. Luckily, you've come to the right place for a rundown of the skills and knowledge you'll need to succeed. We'll get started with the obvious ones and move down the list to other things you might not expect.

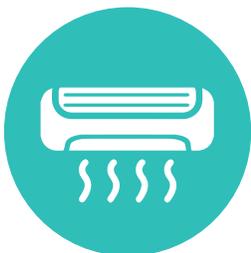

HEATING

As an HVAC technician, you'll need to know the ins and outs of working on a furnace. This includes the pilot light and other components that are key to a furnace heating a home.

VENTILATION

Vents carry hot and cold air throughout a home and heat or cool it centrally. Vents also carry air back into HVAC systems to continue heating or cooling the area.

AIR CONDITIONING

Air conditioning is the other half of many HVAC systems, especially in homes. Whether you're working on a window unit in an apartment or the other half of an AC/furnace combo, a working knowledge of air conditioners is crucial for you to succeed.

REFRIGERATION

Refrigeration systems are often included with HVAC work. HVAC technicians take calls to work on everything from commercial coolers to refrigerators in homes.

INSTALLATION

Installing HVAC systems is one of the biggest duties HVAC technicians take on. In order to install furnaces and air conditioners properly, you need to know how they function inside and out.

MAINTENANCE AND REPAIR

You'll also need your in-depth knowledge of HVAC systems to properly repair and maintain customers' systems. Maintenance and repair are large components of HVAC programs at trade schools.

LEARN HVAC AT COYNE COLLEGE

Now that you have a general overview of everything an HVAC technician needs to know, you might be wondering how you go about launching your career in the field. The answer is simple: by enrolling in Coyne College's HVAC Refrigeration program.

Coyne's knowledgeable instructors will teach you the trade in a course program you can finish in as little as 42 weeks. With hard work and dedication, you can be ready to enter an in-demand field upon graduation.

Don't wait. Inquire today.
